

Dav El[®]
BOSTONCOACH[®]

Safe & Reliable Chauffeured Car Service

ALL OUR VEHICLES ARE DISINFECTED BETWEEN PASSENGER CHANGES
WITH VITULA BIOCIDES[®] - EPA APPROVED & 99.999% SANITIZATION!

At Dav El | BostonCoach, the health and safety of our passengers remain our top priority.

We sanitize our vehicles through an electrostatic disinfectant spraying system using Vitula Biocide[®], the safest and most effective EPA Approved, non-toxic hospital grade disinfectant which has been certified by the CDC for use against SARS-CoV-2, the coronavirus that causes COVID-19.

Breakthrough Medical Grade Disinfectant Technology

ViTula BioCide[®]

- ✓ Spray-only, no rinse/wipe needed
- ✓ Non-Corrosive
- ✓ Non-Irritating to skin
- ✓ Mold & bacteria killer
- ✓ Odor eliminator

Your Well-being is Our #1 Priority

In the next weeks and months, we expect to see COVID-19 quarantine restrictions relaxing and businesses resuming operations. We at Dav El | BostonCoach understand our clients may be anxious about returning to a level of normalcy and want to share with you what we are doing to ensure peace of mind for those who travel with us now or in the near future.

Safe, Clean Vehicles

- We are cleaning and disinfecting our vehicles multiple times each day, including between all passenger changes. This cleaning process includes all handles, power switches, door storage areas, windows, cup holders, and car seats (including booster seats).
- We have carefully researched and chosen the best disinfecting product available, Vitula Biocide: a CDC Certified disinfectant for use against SARS-CoV-2, the coronavirus that causes COVID-19.
 - CDC Certified and Registered
 - Safe for human touch
 - Will not stain clothing
 - 99.999% sanitization
 - Medical-grade hospital disinfectant
 - Non-toxic, environmentally sound, no residue
- We are also using Sani Professional Disinfectant Multi-Purpose Wipes, which are EPA-registered disinfectants that have qualified under EPA's emerging viral pathogens program for use against SARS-CoV-2.
- We use the latest electrostatic disinfectant spraying system on our fleet to ensure proper sanitization.

Your Well-being is Our #1 Priority

Safe, Comfortable Passengers and Employees

- Dav El | BostonCoach has secured enough equipment (masks, gloves, hand sanitizer, and antibacterial wipes) to protect our clients and drivers. Chauffeurs are required to wear masks and gloves at all times. We recommend that passengers bring their own masks and gloves.
- We now have social distancing seating available to suit your preferences. For example, vehicles with more than one passenger may employ a zigzag pattern of seating. We've also modified our driver and passenger interaction practices. Your chauffeur will open and close doors to the vehicle and the trunk, and passengers can handle their own luggage to avoid even the chance of contamination. We've removed all courtesy items from our vehicles and recommend that passengers avoid unnecessarily touching buttons inside the vehicle.
- To ensure healthy ventilation, we will recommend to passenger that they open windows rather than use air conditioning.

Chauffeurs have been thoroughly trained on the new service standards as well as how to safely clean and disinfect their vehicles. Refresher training will continue on an ongoing basis. We recognize this is a challenging time for us all, but we remain deeply committed to you and your needs. As the CDC modifies recommendations, we will continue to adopt the latest best practices.

In addition to our protective guidelines, we are open to any health and safety requirements or special requests you or your staff may have as you return to a normal work environment. Whether you need private transportation or increasingly popular employee shuttle service, we are here and ready to partner with you. In the meantime, stay safe and healthy.
