

COVID-19 Safety Standards

We are COVID-19 ready!

The COVID-19 pandemic has been a very challenging time for people across the world and the recovery will be just as challenging with unprecedented measures needing to be put in place to ensure life can return to some form of normality, whilst containing the virus and ensuring safety of the public.

We have been working hard to implement our plan of how we intend to keep talixo passengers safe. We've collaborated with our fleet-partners to establish and implement a new set of strict hygienic and behavioral measures to ensure safe transportation.

In order to give full transparency on implemented safety standards Talixo created a Covid-19 Safety Rating System in collaboration with our fleet-partners. The **standard rating is a prerequisite for all Talixo rides globally** and based on World Health Organization guidelines and local regulations that are being implemented by the governments of the countries where we operate. The **extra and top ratings are implemented in addition to provide our customers extra safety during a Talixo ride.**

Please find below an overview of Talixo's Covid-19 safety ratings:
